To: Richard Vendetti, Southern Shrimp Alliance

Richard, we are currently collecting routine basa samples at the wholesale level. We have been doing these test for approximately 2 years with approximately 40 samples collected. We have only had one sample that tested above the FDA action level for flouroquinolones. We are in the process of purchasing a new machine that will return the results quicker. We plan on broadening our scope in the future to test for other antibiotics.

Thanks,
Buddy Woodson
